## DETAILED ACTION

### *Claim Rejections - 35 U.S.C. § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 line 10 recites the limitation "said capturing only circuit" whereas claim 1 line 5 recites "a capturing only path". This claim lacks antecedent basis.

### *Claim Rejections - 35 U.S.C. § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Art Unit: 2611

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Wilkinson (5,812,125).

Regarding claim 1, Wilkinson discloses a video data transfer system (fig 1 and col 2 line 36 - col 3 line 38), a real time output path (fig 1, col 2 line 63 - col 3 line 20, output path is from graphics adapter processor 220 to graphic output device 150) through which video data processed by a video processor (fig 1 item 220) is sent to a display (fig 1 item 150, col 3 lines 15 - 20) via a frame buffer (fig 2 item 240), a capturing-only path (fig 1, col 3 lines 21 - 38, capture-only path is from camera 270 to video processor 261) which is independent of real time output path (capture-only path, from camera 270 to video processor 261, is independent of the output path from graphics adapter processor 220 to graphics output device 150) and through which video data is sent to a system memory via a system bus (fig 1, col 2 line 9 - col 2 line 62 - video data from camera 270 is sent to main memory 120 or hard disk 125 via the bus in host computer 105).

*Allowable Subject Matter*

5. Claims 2 and 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2<sup>nd</sup> paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 2611

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to teach a video data transfer system comprising a real time output path and a capturing-only path which is independent of the real time output path and through which video data is sent to a system memory via a system bus, wherein the real time output path comprises an off-screen memory and a display control circuit which receives video data from the video processor via a data bus for enlargement and interpolation processing and transfers processed results to the display, wherein the capturing-only path comprises a gate which is opened only when video data is received from the video processor for capturing and wherein a memory means stores the video data sent through the transferred via the system bus.

### *Conclusion*

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Reddy (6,081,279) - Shared memory graphics accelerator system

Storm et al (5,999,196) - Processing units for graphics accelerator
